ABAQUS finite element analysis program 575-585
Abrasion 43-50
Abrasive, polyborosiloxane and silicon carbide 255-265
Acoustic modal analysis 143-151
Actuators, pneumatic position control 167-176
Adaptive control algorithm, robust 363-372
Adaptive remeshing 353-361
Aerodynamic mesh, unstructured 549-564
Aeroelasticity analysis, non-linear 549-564
Aeroelasticity analysis, three-dimensional 549-564
Air flow patterns 297-307
Air-filled voids 399-407
Algorithm, robust adaptive control 363-372
Algorithm, three-dimensional shortest path 373-381
Algorithm, Uzawa's 519-528
Algorithms, hybrid fuzzy logic 167-176
Anemometry, laser Doppler 317-331,489-498
Anemometry, phase Doppler 465-475
Annulus, rotating 123-134
Annulus, stationary 123-134
Antenna structural model 267-275
Arc welding, gas tungsten 187-195
Assembly, multi-degree-of-freedom component 267-275

Balancers, rotating mass 135-141
Bearing condition monitoring, rolling element 277-285
Bearing defect detection 277-285
Bearing dynamics 409-432
Bearing stiffness, journal 215-223
Biocoherence analysis 277-285
Biped robots 1-14,177-186
Blade, NASA Rotor 67 fan 549-564
Blades, turbomachinery 549-564
BOSOR 5 software program 477-488
Boundary, exergy transfer 541-547
Buckling, cylindrical shell plastic 477-488
Buoyancy-induced flow 489-498
Burnt gas ratio, residual 383-393

Cable spreader suspension systems, multi- 225-237
Cable stretch asymmetries 225-237
Cam profile determination, plate 333-339
Cams, cylindrical 565-574
Cams, globoidal 565-574
Cams, planar 565-574
Cams, spatial 565-574
Centrifugal compressor vaneless diffusers, conical 51-61
Centrifugal compressor vaneless diffusers, straight wall 1-61
Centrifugal fans 287-294
Clearance joint modelling 215-223
Coefficients, Coulomb frictional 529-540
Collision avoidance 373-381
Collisions, droplet 465-475
Combustion engine, rotary 587-596
Component assembly, multi-degree-of-freedom 267-275
Component structures, flexible 309-316
Composite material, glass/polyester 399-407
Composites 33-42
Compressor vaneless diffusers, conical centrifugal 51-61
Compressor vaneless diffusers, straight wall centrifugal 51-61
Compressors, high-pressure reciprocating gas 153-165
Computational fluid dynamics 91-94
Computational fluid dynamics, PHOENICS 489-498
Computational fluid dynamics, three-dimensional 465-475
Condition monitoring, rolling element bearing 277-285
Conduction, non-linear heat 519-528
Conical centrifugal compressor vaneless diffusers 51-61
Contact loss 215-223
Control algorithm, robust adaptive 363-372
Convection, forced 123-134
Convection ventilation, natural 489-498
Convex arbitrary-shaped followers, oscillating 333-339
Couette flow heat loss model 587-596
Coulomb frictional coefficients 529-540
Coupling analysis, Holset RB 575-585
Cracking 23-31,33-42
Cranes, gantry 225-237
Cross-flow, tube bundles 317-331
Cross-flow heat transfer 245-253
Cryocoolers 341-352
Cylindrical cams 565-574
Cylindrical roller followers 565-574
Cylindrical shell plastic buckling 477-488

Damping 215-223
Damping, linear 79-90
Damping, structural 445-452
Damping, viscoelastic 111-121
Darcian flow 519-528
Decomposition, domain 519-528
Defect detection, bearing 277-285
Deformation 433-444
Demodulation, phase 201-213
Design, fan volute profile 287-294
Detection, flaw 399-407
Diesel engine, turbocharged direct injection 383-393
Diesel engines, direct injection 69-78
Diffusers, conical centrifugal compressor vaneless 51-61
Diffusers, straight wall centrifugal compressor vaneless 51-61
Direct injection diesel engine, turbocharged 383-393
Direct injection diesel engines 69-78
Direct least-squares methods 529-540
Disordered cyclic structure vibration 267-275
Domain decomposition 519-528
Doppler anemometry, laser 317-331,489-498
Doppler anemometry, phase 465-475
Drives, robot 529-540
Droplet collisions 465-475
Dynamic analysis 309-316
Dynamic instability, plate 445-452
Dynamic tyre forces 97-110
